Indian Institute of Information Technology Sri City, Chittoor

Course Name: Python for Data Science

Monsoon 2026

Project statements **12.10.2026**

Instructions:

You have to implement one project which has been assigned to you. You should not work on a project which has not been allocated to you. For the submission of the project and other "To do's" you are advised to carefully read the following.

1. A project will be evaluated for 50 marks and it has 20% weightage towards the final marks.
2. **Evaluation plan:**
    a. **Understanding the theory to solve the project problem (10%):** You should write a brief account of the theory which you should use to solve your project problem.
    b. **Implementation of the project (20%):** You are encouraged to write code on your own without using existing library packages. For the correct code you will get full marks. You should submit your implementation only as python notebook.
    c. **Experimental results (10%):** For each project (except 2 groups), you have decided the dataset to be used. You should use the recommended dataset. You can download the dataset from Kaggle or any other known source. If you find some other dataset better for reporting, you are free to use that (same topic).
    d. **Report submission (mandatory) (10%)**
3. The report should include 2(a)-(d) as mentioned above. The report should be written in **Latex**. Please add a front page, including the team details, title of the project, and date of submission. Also mention the individual contribution towards the project.
4. The final submission should consists of two files (1. The implemented code as separate file and 2. The final report) zipped together as Project_XXX, where XXX is the Group id. The report should be submitted in **Turnitin**.
5. Plagiarism, if found will be taken seriously. At the extreme, the team(s) may be awarded "F" grade. So prepare a unique report.
6. **Last date of submission is: 15.11.2026, 18:00 hours (hard deadline).**

Important: *No email submission will be allowed under any circumstance.*
